

January, 10, 2016

\*\*\*FOR IMMEDIATE RELEASE\*\*\*

On Friday, January 8<sup>th</sup>, 2016, members of Denfeld Nation Automation (DNA) Robotics Team 4009 inspired students at the Meyers-Wilkins's STEM Day. The team showed the students their robots and taught them about STEM (Science, Technology, Engineering, and Math) education. They also answered questions, gave the students an in-depth look at the workings of the robots, and let them drive two of the team's past robots. The volunteers talked about the robotics build season, and what it was to be a member of *FIRST* Robotics.

DNA member Matt Johnston shows students attending Myer-Wilkin's STEM Day how to load the ball into the robot.
