

July 22nd, 2017

Greetings,

Denfeld Nation Automation (DNA) FIRST Robotics Team 4009 recently competed in the Gitchi Gummi Regional hosted by Duluth East Daredevil's robotics team. DNA has gained many new members recently and this tournament was a great way to introduce them into what a regional will entail. DNA also trained in a new drive team after the graduation of four of the drive team members previously on the team. The Gitchi Gummi Regional strengthened the relations between the drive team creating a unified team. Additionally, King Tec FRC Team 2169 held an informative presentation on the topic of the Chairman's award. It was very educational and helped the team gain a perspective on how other teams function. Overall this regional was very successful. By participating we gained imperative knowledge that will be useful in the upcoming competitions.

ROBOTICS IS IN OUR BLOOD
