Denfeld Robotics tops list of teams headed to the Minnesota State Robotics Competition

Denfeld Nation Automation (DNA) Team 4009 is the number one ranked team out of 30 high schools heading to the Minnesota State Robotics Competition this weekend. They earned their spot primarily due to the team's undefeated championship run at the Lake Superior Regional, where they also earned the prestigious Engineering Inspiration Award. The State Competition will take place from May 20th-21st at the Mariucci Arena located in the University of Minnesota. For more information visit the team's website at: www.denfeldrobotics4009.org.

This is the last official competition of the season following the team's two regional events and DNA's successful performance at the World Championship where they made it to the semifinals in the Galileo Division. Overall the team has had an amazing season, and is looking forward to another exciting competition this weekend.

ROBOTICS IS IN OUR BLOOD
