Denfeld Nation Automation (DNA) Update for Week 1

This week, we were given the challenge for the 2018 FIRST Robotics Competition POWER UP!
We have included a link to this year's challenge below.

<https://www.youtube.com/watch?v=HZbdwYiCY74>

Our first week consisted of team brainstorming and being well read on this years' rules. We started a prototype robot, as well as designing our competition robot on a program called SolidWorks. SolidWorks is a modeling computer-aided design and computer-aided engineering computer program. So far, we are on schedule for finishing tasks and completing the final design. We also have been starting construction of field elements.

Please stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should add to these weekly updates.

Thanks again for your support this year.

ROBOTICS IS IN OUR BLOOD

DNA at Kickoff for this year's challenge, FIRST POWER UP!
