Denfeld Nation Automation (DNA) Update for Week 3

Greetings Sponsors,

We are 25 days away from bag and tag, the end of build season. This week our CAD team finalized the main robot design and has moved on to designing our game piece manipulators. Our detailed CAD design makes the building process of the robot easier and more efficient for our mechanical team. We were able to complete our frame, as well as the front wheel attachment, and added our lift. Our programming team has started the robot competition code, and is tuning the gyro code they started during week two. Additionally, our awards team is currently working on our submission for the Chairman's Award, the most prestigious award in all of FIRST.

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should add.

Thanks again for your support this year.

ROBOTICS IS IN OUR BLOOD
