Denfeld Nation Automation (DNA) Update for Week 5

Greetings Sponsors,

Our fifth week of build season has been full of accomplishments for our sub teams. Our build team prototyped a power cube manipulator which is in the final stage of the manufacturing process. The electrical subteam finished placement of electronic components, bringing us closer to completion of the robot. Programming finished coding the drivetrain and are now working on the autonomous program. Our awards team finished writing the Chairman's award and submitted it. They are also continuing to work on the Entrepreneurship Award submission.

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should add.

Thanks again for your support this year.

**ROBOTICS IS IN OUR BLOOD**
