Denfeld Nation Automation (DNA) Update for Week 6

Greetings Sponsors,

The sixth week of build season has been busy with bag and tag only four days away. Our build team has been working hard on a climbing mechanism as well as perfecting the robot's power cube intake. Programming subteam perfected the power cube dumper code and produced a debug log for any possible errors. These two subteams worked together to test drive our robot as well. Spirit team's avatar has been accepted and is now viewable on The Blue Alliance. Our awards team sent in the submission for the Entrepreneurship Award, leading into work with their next project, the Chairman's Award video. We culminated the week with our Robot Reveal. Community members were able to see our unveiled robot "Alpha Andy" and watch it perform the tasks of this year's challenge. This was a great opportunity for us to thank our sponsors and the community for their support this build season.

Stay tuned for the following updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should add.

Thanks again for your support this year.
