Denfeld Nation Automation (DNA) Kickoff Update

Greetings,

This past Saturday the 2019 *FIRST* Robotics Competition game was revealed by a kickoff stream that our team viewed at UMD. This year's challenge is "DESTINATION: DEEP SPACE sponsored by the Boeing Company". In this challenge robots are tasked with delivering cargo and hatch panels to either rocket ships or a cargo ship on the field. If you would like to learn more about this year's challenge we have included a link below.

After attending the UMD Kickoff event our team headed to the West Duluth American Legion to prepare for the upcoming 6 week build season. While at the Legion we analyzed the game manual, developed ideas for our strategy for the new game, and devised designs for this year's robot.

We are very excited to begin the 2019 build season! In order to keep up with our progress, make sure to stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should include to receive these updates.

Thank you again for your support this year!
