Denfeld Nation Automation (DNA) Week 3 Update

Greetings,

Week three of our build season has been very productive. Our game design team has been working hard to finalize game elements for the FIRST Game Design Challenge. We also continued to make sure that the game was simple enough for first years teams to be able to complete, but also challenge veteran teams. As well as working on the Game Design Challenge, we started working on a critical path priority list for us to start working on once we are able to have in-person practices again.

The awards sub-team has continued to make significant progress on the FIRST Chairman's Award, and has surpassed their weekly Chairman's goals. DNA hopes to keep up this progress as they continue work on the Game Design and Skills Challenges.

We are very excited to be in the 2021 build season! In order to keep up with our progress, make sure to check out our social media sites and stay tuned for the following weekly updates. We would like to thank all of our sponsors for all of their continued support during this season.

We would like to thank all of our sponsors for all of their continued support during this season and for seasons to come. We couldn't do what we do without your support.
