Denfeld Nation Automation (DNA) Update for Week 6

Greetings Sponsors,

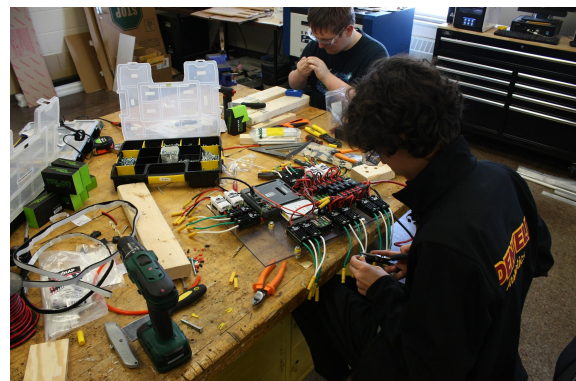

This week we have accomplished another huge milestone; our robot has entered the final stage of build. In order to complete our robot, the build subteams have been tirelessly wiring our robot as well as refining the robot components to perfection. The programming students have been working hard to write code for targeting and tweaking the Limelight and also fine tuning the autonomous code. We are also continuing to 3D print spare parts for our robot and have begun creating the CAD binder to display our designs at competitions.

The Business subteam has been working on the Chairman's presentation and video, and is continuing to raise funds to complete our budget. To help us reach our goal to attend our second regional, please re-post the following link to help us get the word out about our GiveMN fundraiser: <https://www.givemn.org/story/Jylnnf>.

We will be attending the ICC scrimmage on Sunday, February 16th to test our robot in practice matches. This event gives us the opportunity to collaborate with other teams, gain new insights, and offer any assistance to teams who need help.

We are very excited to be in the 2020 build season! In order to keep up with our progress, make sure to check out our social media sites and stay tuned for the following weekly updates.

Thanks again for your support this year! Mark your calendars to come see us at our competition on March 6th and 7th at the DECC.

ROBOTICS IS IN OUR BLOOD
