Denfeld Nation Automation (DNA) Week 7 Update

Greetings,

To start our seventh week of build season, DNA began in-person practices! During practices this week the build team worked on putting the turret of the robot back together as well as fixing the wiring on the robot. The programming sub-team worked on getting macros to work for the autonomous portion of the Infinite Recharge at Home Challenge.

After months of hard work, the business team completed the final edits for the Chairman's award and submitted it to the FIRST judges. The Chairman's award is the most prestigious award that a team can receive in FIRST. As well as working on Chairman's, the business and build team started drawing the game that they have designed, and worked on finalizing the presentation for the Game Design Challenge.

We are very excited to be in the 2021 build season! In order to keep up with our progress, make sure to check out our social media sites and stay tuned for the following weekly updates. We would like to thank all of our sponsors for all of their continued support during this season.

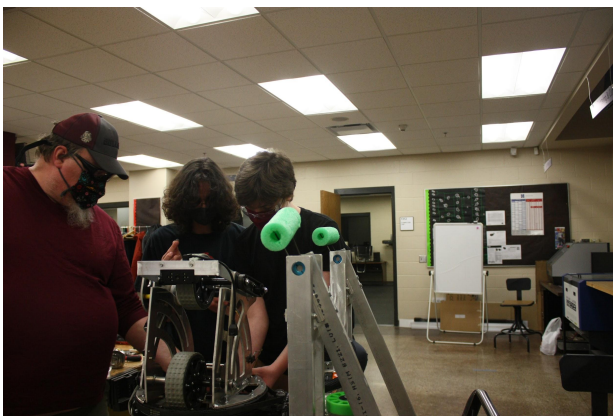

We could not expand our knowledge and skills without your support!
