Denfeld Nation Automation (DNA) Update for Week

Greetings Sponsors,

Week eight of our build season has been very eventful and productive. Our team worked hard to complete the Game Design and Infinite Recharge at Home Challenges and submit them. Our submission for the Game Design Challenge is called 4009 Leagues Under The Sea inspired by the book *10,000 Leagues Under The Sea*. The game features a giant Kraken in the middle of the field where teams are attempting spin in order to score points as well as score treasure in treasure chests on the opposite sides of the field.

The build team worked hard this week putting together the submission for the Infinite Recharge At Home Challenge. This included putting together the photos for the judges, and writing detailed explanations about what the robot does. The build team is continuing to work on improvements on the robot as the deadline for the Skills Challenge is nearing.

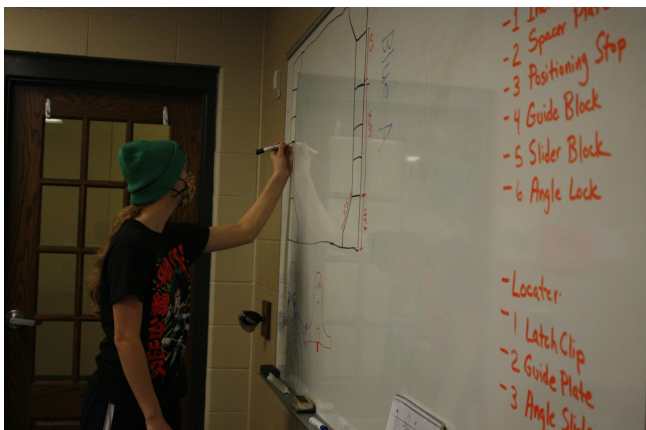

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization who would enjoy receiving these updates.
