Denfeld Nation Automation (DNA) Update for Week Five

Greetings,

During the fifth week of build season our team hit many milestones. The CAD sub-team is working on polishing up all of the SOLIDWORKS files and are running intersoftware tests. The robot mech sub-team finished putting together the electoral board and improved our intake mechanism. Secondly, they were able to run successful tests on all of the main components. The programming sub-team has finished the outline of the code and are continuing to test and work out any and all bugs. The business sub-team is finishing up the final edits on the chairman's award as well as making all of the graphics for this season's competitions.

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should include to receive these updates.
