Denfeld Nation Automation (DNA) Update for Week Six

Greetings,

During our sixth week of build season DNA worked hard to get everything completed before our week zero scrimmage. The robot build sub-team finalized and built our climbing mechanism. The programming sub-team worked on the code for the climb and as well as fine tuning the intake and outtake systems. The CAD sub-team was able to finish the design of the hooks and the arms for the climbing mechanisms. The business sub-team submitted the Chairman's award and will continue to work on the presentations for the awards we are competing for. DNA continues to work on drive practice and perfecting elements of our robot.

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should include to receive these updates.
