Denfeld Nation Automation (DNA) Update for Week Two

Greetings,

During DNA's second week of build season, many important tasks were accomplished. The programming sub-team worked on tuning a defense mechanism on our practice bot as well as finishing up the majority of the code for the other mechanical movements. The robot build sub-team finished up the prototype for our intake system and shooter mechanisms. DNA's field build sub-team worked hard to complete the anger field element and started work on the lower hub part of the field. In addition to this the business sub-team completed our executive summary for the Chairman's award and worked on graphic design for our competition shirts.

We have a Chipotle Fundraiser happening February 2nd from 5pm - 9pm at the Miller Trunk Highway Chipotle. You can also order online with the code **Q9WEX3L** to support our team.

Stay tuned for the following weekly updates. Please let us know if you prefer to be removed from these emails or if there are other people in your organization that we should include to receive these updates.
