Denfeld Nation Automation (DNA) Update for Worlds

Greetings Sponsors,

DNA Robotics competed hard at the World's Championship down in Houston, Texas. They came in 37th of 77 teams in the Galileo division, one of the 8 divisions at the championship. They had the opportunity to work together with teams from all around the U.S. and even teams from Israel! The students worked hard to scout every team in their division so that their drive team was able to have data to work with to create the best strategies for their matches. Worlds was also a great opportunity for the students to learn, many students took the opportunity to go to workshops held for specific purposes like business, coding, or new ideas for the next year. DNA could not have gone without the support of their amazing community, they would like to say a thank you to all the sponsors, parents, alumni, and everyone else that made it possible for them to go to Worlds. The diversity, cooperation (a term coined by First robotics which means, “displaying unqualified kindness and respect in the face of fierce competition.”) and overall community were amazing and really showed the values of First and how even though teams are competing against each other they do everything to help one another.

**We are very excited to begin the 2023 build season!** In order to keep up with our progress, make sure to check out our social media sites.
