Denfeld Nation Automation (DNA) Week One Competition Update

Greetings,

DNA attended the Northern Lights Regional at the DECC in Duluth, MN. Two competitions took place simultaneously, the Lake Superior Regional, and the Northern Lights Regional. Combined, 108 teams were attending, making it one of the biggest gatherings of FRC teams besides the Worlds Championship in Houston, Texas.

DNA competed strong, being the first pick of the Fifth Alliance, and making it all of the way to the semifinals! Throughout the competition, they embodied the values of FIRST (the robotics organization), Gracious Professionalism, and Coopertition. The students on DNA went to the DECC early on Wednesday to help set up the event, as well as help the other teams loading in. Duluth is known for its constant construction and unfortunately, the DECC was going through some construction that limited the doors that were able to be loaded into. The students stayed until 9 pm to make sure every team was able to load in and get everything plugged in for the competition!

If you'd like to come see DNA and other teams in the area practice when the ARC is at the Denfeld High School, we invite you to come visit the Denfeld Gym on March 15th! The field will be set up for the majority of the day so please come visit whenever you can!

To keep up with our progress, make sure to check out our social media sites! Our second regional will be held in La Crosse Wisconsin, from March 20 to March 22, 2025.
