Denfeld Nation Automation (DNA) Week Three Competition Update

Greetings,

DNA is prepared for its upcoming second competition after scouting the attending teams and practicing at the Arrowhead Robotics Coalition (ARC) field, which took place at Denfeld over the weekend. This provides teams with a chance to train on an accurate recreation of the field they will compete on, as well as an opportunity to collaborate with local teams.

DNA also has its silent auction just around the corner. The team has been working diligently to create items for the auction, so keep an eye out for both donated and student-made items. The silent auction will be held in the commons of Denfeld on Friday, March 28th, starting at 5:00 PM. They will serve lasagna with Italian bread and garden salad for just ten dollars per adult and seven dollars for students; children five and under eat free! Vegetarian options will also be available.

DNA's second regional event, the Seven Rivers Regional, will take place in La Crosse, Wisconsin, from March 20 to March 22. At Seven Rivers, DNA will compete with 50 other teams for a chance to qualify for the state and world competitions! Come out and support the team if you can, or watch the live stream that will be available soon. The students have invested a great deal in building this incredible robot!
