

## **FOR IMMEDIATE RELEASE**

### **Denfeld Nation Automation (DNA) STEAM Day Press Release**

**DULUTH, MN – May 17, 2025 –**

DNA was set up at the STEAM Festival at The Depot on Saturday the 17th showing off some of our previous robots to the public. They displayed three robots including Debatron, the robot from the previous season that has just come to an end. Two of the three robots were charged up and running for the public to interact with, sending balls flying for kids to catch and allowing kids from the community to interact with the machines. They also set up tables to answer any questions as well as promote robotics and STEM in the community. Those tables also had shirts and pins that showcased the amazing graphic design that the team has done along with a video that showcased all of the things Debatron can do during competitions. DNA had a lot of fun and was very excited to continue to participate in an event that we have been at for many years.

Along with the STEAM depot DNA has another event called Unity in the Community. The event will take place on August 19th from 4pm to 6pm at Bayfront Festival Park. Come check out DNA as they demonstrate some of the robots they have built throughout the years. They will have students there answering questions and talking about the wonderful season that just came to an end.
