

DULUTH, MN – 21, March, 2026 – Competition Week Three

DNA's week three has been filled with long nights and time at the Arrowhead Robotics Coalition (ARC) field. DNA spent last weekend at Proctor High School practicing on the ARC field. They are currently spending this weekend at Marshall High School while they have custody of the ARC field for the weekend. The ARC helps teams calibrate their robot on a proportional field to the official one used for competitions.

DNA's build team has been powering through the week making improvements on their robot, ensuring it is in peak condition for their second competition. DNA will be attending the 10,000 Lakes Regional in Minneapolis, Minnesota. Practice matches will take place on Thursday 26th with qualification matches on Friday 27th and Saturday 28th, with Saturday including the regional's playoff tournament.

DNA's build team has added a climber to their robot allowing them to climb the ladder. Their programming subteam has been coding up a storm having made many improvements to the shooter allowing for a more accurate autonomous period along with a higher accuracy percentage of shots made while driving.
