

DULUTH, MN – September 22, 2026 –

Greetings from DNA,

DNA has been out this summer showing off their robots and inspiring the community. The team did six major events this year in which they displayed their robots and discussed robotics with the attending people.

The team participated in their first event of the summer by appearing at STEAM Day on May 9th. Other events that DNA attended during this past summer are Huskies Robotics Night on June 10th, The Duluth Airshow on July 11th, and National Night Out on August 4th.

They also did a special event on July 28th called Project Party, which is an event held twice a month to celebrate the birthdays of kids at the Steve O'Neil Apartments. This was a great opportunity for them to give back to our community and to make these kids' birthdays special! They helped to fill piñatas and party favors for the robot-themed party. They brought one of their robots to play catch with the kids there, providing a fun activity for the event!

On August 24th, DNA showed off robots from past competitions to the community at Unity In Our Community. Team members helped kids explore the mechanics involved in designing and creating robots while demonstrating the product end of invention by letting kids play catch with a resident build. This event also gave an opportunity for middle and high schoolers to get a feel for the robotics team and learn more about the who, what, and why of its vibrant community.
